

Luxor CRM to Host a Booth and Present at the 10th Annual DRC Conference & Trade Show at the Toronto Metro Convention Centre

Toronto, Canada—May 10, 2010--Luxor CRM will be hosting and presenting at the 10th Annual Disaster Restoration Contractor's Conference & Trade Show on June 3rd and 4th at the Toronto Metro Convention Centre. The DRC Trade Show will bring together some of the largest restoration companies across North America and consist of 40 educational sessions, hands-on workshops and some of the most noted exhibitors.

The restoration industry is becoming one of Luxor CRM's most prominent customers as we have developed a tailored, complete solution that meets each owner's individual needs. We will be hosting a booth to provide demonstrations and further information on how our SaaS-based software delivers powerful features for managing and optimizing organizational relationships and sales processes, and unique analytic tools for improving organizational performance. Also, Luxor's CEO Lukas Szczurowski will be taking the stage to discuss his knowledge on computer-based job management systems.

Luxor CRM is extremely eager to attend the conference this year and looks forward to meeting the restoration industry's top professionals.

About Luxor Corporation:

Luxor Corporation develops and markets Luxor CRM, a web-based CRM and SFA solution that leads the industry with its ease-of-use and intuitive browser interface. In addition to its CRM product, Luxor provides claims management software for the restoration industry. With no contracts and no setup fees, Luxor is the smart choice for hosted CRM and claims management. For more information on Luxor CRM, visit www.luxorcrm.com

Luxor Corporation is a member of the Atum family of companies.
